

INDEPENDENT SALT Company

We offer Fine Salt in **Bulk Truckloads, 50-pound plastic bags,** and **Tote or Bulk Bags** weighing 2450 pounds. Both the 50-pound plastic bags and Tote Bags are stretch wrapped and palletized.

Technical Information for Fine Grade Salt

ASTM Compliance

Our Fine grade will meet the requirements for Type II Grade II Sodium Chloride as established by the American Society for Testing and Materials.

Description

Our Fine grade is translucent grey to white in color. The appearance is powdery. We apply an anti-caking agent Yellow Prussiate of Soda (YPS) at approximately 200 parts per million (ppm) as an anti-caking agent.

Uses

Fine Grade salt is most often used either as a feed additive for livestock or in the curing of animal hides. Although less common, fine salt can also be used to melt ice and snow on roadways, parking lots, sidewalks, and anywhere else ice control is needed.

Typical Chemical Analysis	
Sodium Chloride	95 to 97%
Calcium Chloride	0 to 1%
Magnesium	0 to 0.5%
Calcium Sulfate	0 to 1.5%
Magnesium Chloride	0 to 1%
Other Trace Minerals	0 to 1%

Typical Sieve Analysis			
Mesh	Dry Weight	% Retained	% Passing
3/8 inch	0	0.00%	100.00%
1/4 inch	0	0.00%	100.00%
4 mesh	14	1.38%	98.62%
8 mesh	597	58.88%	39.74%
10 mesh	172	16.96%	22.78%
30 mesh	161	15.88%	6.90%
-30 mesh	70	6.90%	0.00%
*Total Dry Weight 1014 Grams
